PREMIUM HARDWARE

Robust, stable & ergonomic POS system

UP TO 10 YEARS GUARANTEE

The generous 5-year guarantee (for hardware including wear parts) can be extended to 10 years when buying the POS Touch 15 II PCT.

CONVENIENT

Powerful software, an intuitive GUI including gesture recognition and individual programming ensure a fast and convenient workflow.

COMPLETE SOLUTION

Numerous tried-and-tested interfaces for all conceivable peripheral devices and for connecting up to backoffice programmes enable tailor-made complete solutions.

Leading in POS Technology
More than 185,000 installed systems worldwide

FUTURE-PROOF DESIGN

High-quality materials and a lack of fragile components such as fans make the hardware on the POS Touch 15 II PCT extremely robust and durable. The ability for the system to accept software updates in the event of changes to the law e.g. new fiscal requirements, provides further security for your investment.

DATA SECURITY

The system is not PC-based and is thus perfectly protected against viruses and trojan horses. All data is saved on the POS system and not on a vulnerable cloud. The POS system shuts down without data loss even in case of power failure. In addition, the data can be backed up at frequent intervals onto a USB flash drive.

EXCELLENT SERVICE

Vectron products are distributed via a close-knit network of qualified specialist trade partners. This guarantees the provision of expert advice, individual solutions and reliable 24/7 service provision on-site or via our hotline. Remote

maintenance options round off the range of services. Every minute the POS system is broken down ultimately costs money!

PERFECTLY NETWORKED

Devices such as customer displays, cash drawers, printers, scanners, card terminals, vending machines, cash management systems, etc. can be connected up via the numerous interfaces.

CLEVER ADDITIONAL FUNCTIONS

The online marketing tool bonVito enhances Vectron POS systems to include customer loyalty, reservation or reporting functions.

By fully integrating it into the POS system, it brings information from both systems together - ideal for setting up a valuable customer list or for evaluation purposes.

bonVito offers among others customer, payment and gift cards, digital stamps and innovative bonus systems. You can directly manage your own individual campaigns via the POS system - securely and without the need for any additional work.

BRIEF & CONCISE OVERVIEW
